

DRINKING WATER PRECAUTION

Boil Your Water Before Using

Due to a loss of water pressure in a portion of the distribution system on Friday, 4/10/2026, caused by a mainline leak requiring repair, potentially harmful bacteria could be present in the water supply. If these bacteria are present, they could make you sick and are a particular concern for people with weakened immune systems. The affected area is limited, but if you have received this notice directly from your water provider, you are in the affected area.

Do not drink the water without boiling it first.

When water service is restored after the mainline repair, customers should bring water to a rolling boil for 1 full minute, allow the water to cool before using, and store the cooled water in a clean container with a cover. Customers should use boiled water that has cooled or bottled water for:

- Drinking
- Brushing teeth
- Washing fruits and vegetables
- Preparing food and baby formula
- Making ice
- Cleaning food contact surfaces

The loss of pressure was caused by the need to shut down the distribution system for a period of time while repairs are made to the mainline serving the area. This notice is only intended for the residents at the following addresses located on Cherry and Dahlia Street: 450 Cherry St, 400 Cherry St, 225 Cherry St, and 1 home at 550 Dahlia St. A water sample will be collected in the affected area and submitted to the lab for bacteriological analysis. We will inform you when tests show no bacteria and you no longer need to boil your water. We anticipate resolving the problem within the next 72 hours.

This boil water advisory is a precaution. To limit risk to health, customers should follow the instructions contained in this advisory.

For more information, go to yourwater.oregon.gov or contact Shanna Gronquist, Public Works Supervisor for the City of Arlington Water System, 541-454-2743. General guidelines on ways to lessen the risk of infection by contaminants in drinking water are available from the EPA Safe Drinking Water Hotline at 1-800-426-4791 or the Oregon Health Authority, Drinking Water Services at 971-673-0405.
